Product Description

Ariens Classic 24 Snow Blower - 920025

A NO-NONSENSE WORKHORSE BUILT TO TAKE ON WINTER'S WORST

The Classic's endless appetite for snow starts with its all-steel construction, including a large 11" steel serrated auger. It may be lightweight and easy to control, but this machine was made to handle serious snow removal, throwing up to 59 tons per hour. Interlocking levers let you operate one-handed when throwing snow and driving. This no-nonsense machine lives up to, and beyond, its name.
