Product Description

Ariens S18E Single Stage Snow Blower - 938027

Perfect for smaller properties, the S18 is our most compact machine - but that doesn't mean it skimps on power. Its AX 99cc engine, with available electric start, delivers consistent quick starts and reliable power to remove up to 39 tons of snow per hour with effortless control. A quick-collapse handlebar takes up less storage space and can be transported with ease. It may be the smallest Ariens® snow blower, but it's big on convenience.

- Electric start - plug in, push the button, and go
- Clean-to-pavement technology
- Small 18" storage footprint
- Quick-collapse handlebar and lightweight for easy transportation
