Product Description

Ariens Platinum 24 SHO EFI Sno-Thro Snow Blower - 921066

- Built for high altitudes, this EFI powered machine will deliver the performance you need and exceed your expectations
- Wide 24” clearing width that moves 73 tons of snow per hour
- Premium features like an LED light bar and headlight, handwarmers, electric chute control, electric start, and one-hand interlock

Features

- **EFI-Powered Ariens AX® Engine** – Built for high-altitude operation while delivering the performance needed for demanding snow removal.
- **24-Inch Clearing Width** – Clears a wide 24-inch path and moves up to 73 tons of snow per hour.
- **Up to 55-Foot Throwing Distance** – Provides a throwing range of 3 to 55 feet for directing snow away from cleared areas.
- **LED Light Bar and Headlight** – Provides added lighting for snow removal in low-light conditions.
- **Electric Chute Control** – Makes it easier to control the direction of discharged snow.
- **Electric Start** – Provides convenient starting operation.
- **Handwarmers** – Add convenience during cold-weather snow removal.
- **One-Hand Interlock** – Provides convenient control while operating the snow blower.

Best Use

- **High-Altitude Snow Removal** – The EFI-powered design is built to deliver performance in higher-altitude conditions.
- **Large Snow-Clearing Areas** – The 24-inch clearing width and capacity of up to 73 tons per hour make it suited for demanding snow removal.
- **Heavy Winter Snow** – The two-stage design provides the capability needed for challenging snow-clearing conditions.
- **Low-Light Snow Removal** – The LED light bar and headlight provide useful illumination when clearing snow in darker conditions.

Ariens Platinum 24-Inch EFI Two-Stage Snow Blower

The Ariens Platinum 24 SHO EFI Sno-Thro Snow Blower – 921066 is built for high-altitude performance with a 24-inch clearing width, EFI-powered Ariens AX® engine, and capacity to move up to 73 tons of snow per hour.
