Product Description

Ariens Path-Pro SS21EC Electric Start with Remote Chute Snow Blower

The Ariens Path-Pro 208 Electric Start with Remote Chute Snow Blower 938033 is a premium single-stage snow blower that combines lightweight maneuverability with convenient features designed for homeowners who want easy, efficient snow clearing on walkways and smaller areas. With a 21 inch clearing width, Ariens AX 208cc engine, 120-volt electric start, and remote chute control, this machine delivers user-friendly operation and reliable performance for light to moderate snowfall conditions. The Path-Pro series represents Ariens commitment to making snow removal more convenient and less physically demanding for residential users.

Ariens AX 208cc Engine with Electric Start

Powering the Path-Pro 208 is the Ariens AX 208cc engine, which provides reliable performance and easy starting in cold weather. The 208cc displacement delivers ample power for the single-stage clearing system, ensuring consistent performance even in wet, heavy snow. The overhead valve design provides improved fuel efficiency and cleaner operation compared to older engine technologies.

The 120-volt electric start system is one of the standout features of this model, eliminating the need for manual pull-starting. Simply plug the machine into a standard household outlet, press the start button, and the engine fires up quickly and reliably. This feature is particularly valuable for users who struggle with pull-cord starting or who want the convenience of push-button operation. Once the engine is running, you can unplug the cord and begin clearing snow. The electric start system makes the machine accessible to a wider range of users and eliminates the frustration of difficult cold-weather starting.

Features

- **Ariens AX 208cc Engine** – Provides the power for the Path-Pro's single-stage snow-clearing system.
- **120V Electric Start** – Allows convenient push-button starting with a standard household outlet, reducing the need for pull-cord starting.
- **21-Inch Clearing Width** – Clears a 21-inch-wide path with each pass, making it suitable for walkways and smaller areas.
- **Remote Chute Control** – Lets the operator adjust snow discharge direction from the operating position.
- **Auger-Propelled Drive** – Uses the auger to help move the snow blower forward during operation.

- **7.5-Inch Tires** – Provides the listed tire size for maneuvering the machine.
- **Single-Stage Design** – Offers a compact snow-clearing option for residential use.
- **Warranty Coverage** – Includes a 3-year residential warranty or a 90-day commercial warranty.

Best Use

- Clearing snow from residential sidewalks and walkways.
- Removing snow from driveways and other smaller paved areas.
- Homeowners who prefer electric starting over a manual pull cord.
- Users who want to adjust the discharge direction with remote chute control.
- Residential snow removal where a compact, auger-propelled machine is suitable.

Ariens Path-Pro 21-Inch Single-Stage Snow Blower with Electric Start

The Ariens Path-Pro SS21EC Electric Start with Remote Chute Snow Blower (938037) combines a 208cc Ariens AX engine, 21-inch clearing width, and 120V electric start for convenient residential snow removal. Its remote chute control allows operators to adjust snow discharge direction, while the auger-propelled design supports maneuvering during clearing. Available at Boyd's Outdoor Power in Dresser, WI, this Ariens snow blower is an option for homeowners maintaining sidewalks, walkways, and smaller paved areas.
