Product Description

Ariens PATH-PRO 212 ELECTRIC START Snow Blower - 938036

Up to 9” of snow is no problem for the Path-Pro Series with its reinforced rubber paddles and adjustable scraper bar. This single-stage snow blower features a tireless Ariens® AX engine that efficiently plows through drifts. Have a limited amount of storage space? Its folding handlebar allows it to fit in compact spaces. The Path-Pro puts snow in its final resting place.

21" clearing width for quick cleanup of sidewalks and driveways
Powerful Ariens AX engine delivers dependable single-stage performance
Manual chute control provides simple, reliable snow placement

Features

- **Ariens AX Engine** – Powered by an Ariens AX engine designed to deliver dependable performance for single-stage snow clearing.
- **21-Inch Clearing Width** – Clears a 21-inch-wide path, making it suitable for routine snow removal from sidewalks and driveways.
- **Reinforced Rubber Paddles** – Designed to move snow efficiently while handling snow depths of up to 9 inches, according to Ariens.
- **Adjustable Scraper Bar** – Helps maintain contact with the clearing surface during snow removal.
- **Electric Start** – Provides an electric starting option for added starting convenience.
- **Manual Chute Control** – Allows operators to direct discharged snow using a straightforward manual control system.
- **Auger-Propelled Drive** – Uses an auger-propelled design to move the snow blower forward during operation.
- **Folding Handlebar** – Folds down to help reduce storage space requirements when the machine is not in use.

Best Use

- **Sidewalk and Driveway Clearing** – The 21-inch clearing width is suited to homeowners maintaining sidewalks, driveways, and other residential surfaces.
- **Light Snow Removal** – Designed to handle snow depths of up to 9 inches, making it an option for routine snow-clearing needs within that range.
- **Compact Storage Spaces** – The folding handlebar is useful for homeowners with limited garage or equipment storage space.
- **Simple Snow Discharge Control** – Manual chute operation provides straightforward control over where cleared snow is directed.

21-Inch Single-Stage Snow Blower with Electric Start

The Ariens PATH-PRO 212 Electric Start Snow Blower (938036) combines an Ariens AX engine, reinforced rubber paddles, and a 21-inch clearing width for residential snow removal. Its adjustable scraper bar, manual chute control, and folding handlebar provide practical features for clearing sidewalks and driveways while keeping storage requirements manageable. Boyd's Outdoor Power in Dresser, WI, offers Ariens snow-clearing equipment for customers researching residential snow blowers. Contact Boyd's Outdoor Power to learn more about the Path-Pro 212.
