Product Description

EGO Commercial 30” Composite Armor™ Deck Mower with Peak Power™

The EGO Commercial 30” Composite Armor™ Deck Mower with Peak Power™ (LMX7600SP) delivers professional-grade performance for commercial landscaping crews and property maintenance teams. Engineered with Peak Power technology, this commercial mower combines the power of multiple 56V ARC Lithium batteries to deliver gas-equivalent performance without the noise, fumes, or maintenance headaches of traditional gas mowers.

Commercial-Grade Construction

Built for the demands of daily professional use, this mower features a reinforced deck design that stands up to the rigors of commercial applications. The composite armor deck construction provides exceptional durability while keeping the overall weight manageable for operators. UV-resistant materials ensure the mower maintains its appearance and structural integrity even after years of exposure to harsh outdoor conditions.

Peak Power Technology

EGO's Peak Power technology combines the output of multiple 56V batteries to deliver power equivalent to gas engines. This advanced battery management system intelligently distributes power demand across connected batteries, maximizing runtime and ensuring consistent performance throughout the workday. The system seamlessly transitions between batteries, maintaining optimal cutting performance without interruption.

Professional Performance Features

- Self-propelled drive system with variable speed control for operator comfort and precision
- Select Cut multi-blade system enables switching between mulching, bagging, and side discharge modes
- Adjustable cutting height with quick-change lever for different turf conditions
- LED headlights for extended working hours and improved visibility in low-light conditions

- IPX5 weather-resistant construction allows operation in various weather conditions
- Foldable design for compact storage and transport between job sites

Battery System and Runtime

The EGO Commercial battery platform provides the flexibility commercial crews need. Compatible with all EGO 56V ARC Lithium batteries, operators can customize their setup based on job requirements. The rapid charging system minimizes downtime, with batteries reaching full charge during typical lunch breaks. Multiple battery options allow crews to maintain continuous operation throughout demanding workdays.

Operator Comfort and Control

Designed with professional operators in mind, the mower features ergonomic handles with comfortable grips that reduce fatigue during extended use. Intuitive controls place key functions within easy reach, allowing operators to adjust speed and cutting height without interrupting workflow. The low-vibration motor design reduces operator fatigue compared to traditional gas mowers.

Environmental and Cost Benefits

Commercial crews benefit from zero direct emissions, making this mower ideal for noise-sensitive residential areas, schools, and healthcare facilities. Operating costs are significantly lower than gas equivalents, with no fuel, oil changes, spark plugs, or air filters to purchase. The reduced maintenance requirements translate to more billable hours and less equipment downtime.

Commercial Warranty and Support

Backed by EGO's commercial warranty program, this mower is covered for professional use applications. The commercial support network provides quick access to service and replacement parts, minimizing downtime when issues arise. EGO's growing dealer network ensures support is available across North America.
