Categories: EGO

Product Description

EGO Commercial Commercial 10" Telescopic Pole Saw

The EGO Commercial Commercial 10" Telescopic Pole Saw (PSX2510) provides professional arborists and landscaping crews with the reach and power needed for overhead cutting applications. Combining EGO's advanced brushless motor technology with a telescopic pole design, this commercial pole saw delivers gas-equivalent performance for pruning and trimming tasks while eliminating the weight and maintenance burden of gas-powered alternatives.

Extended Reach Capabilities

The telescoping pole extends to provide substantial overhead reach, allowing operators to access high branches without ladders or lifts in many situations. The extension mechanism locks securely at various lengths, providing versatility for different height requirements. Lightweight carbon fiber construction keeps the extended pole manageable even at maximum length.

Professional Cutting Performance

Engineered with a high-torque brushless motor, this pole saw delivers consistent cutting power through the full range of pole extension. The motor maintains chain speed even when cutting larger diameter branches overhead. Oregon chain and bar combination provides reliable cutting performance across various wood species and conditions.

Operator Control Features

- Multi-position cutting head adjusts to various angles for versatile cutting applications
- Automatic chain lubrication maintains optimal bar and chain performance
- Tool-free chain tensioning allows quick adjustments in the field
- Transparent chain guard provides visibility while protecting operators from debris
- Trigger lock prevents accidental activation during positioning

Safety and Ergonomics

Designed for professional overhead cutting applications, this pole saw features a well-balanced design that reduces operator fatigue during extended use. The shoulder strap system helps distribute weight, allowing operators to work longer periods with less physical strain. Electronic chain brake provides instant stopping for enhanced safety during professional use.

Weather-Resistant Construction

Built for commercial outdoor use, this pole saw features weather-resistant components that withstand exposure to varying conditions. Sealed motor housing protects internal components from moisture and debris. UV-resistant materials maintain structural integrity despite constant sun exposure during professional use.

Battery System Advantages

Powered by EGO's 56V ARC Lithium battery platform, this pole saw eliminates the overhead weight of gas engines typically found in pole saw designs. The reduced weight at the cutting end makes overhead work significantly less tiring. Multiple battery capacity options allow crews to balance weight and runtime based on job requirements.

Noise Reduction Benefits

Operating at substantially lower noise levels than gas-powered pole saws, this unit allows crews to work in noise-sensitive residential areas, near schools, and in parks without creating disturbances. The reduced noise exposure benefits operator hearing health during prolonged professional use.

Reduced Maintenance Requirements

The brushless motor and battery-powered design eliminate routine maintenance tasks including spark plug changes, air filter replacement, carburetor adjustments, and fuel system maintenance. This simplified maintenance schedule translates to more productive hours and reduced equipment downtime compared to gas-powered alternatives.

Professional Warranty Support

Backed by EGO's commercial warranty program designed for professional use applications, this pole saw is supported by a network of dealers and service centers providing access to parts and service when needed, minimizing downtime when equipment requires attention.
