Product Description

EGO EGO 880CFM Blower Tool Only

The EGO EGO 880CFM Blower Tool Only LB8800 is a high-performance battery-powered blower that delivers the power and runtime to handle demanding outdoor cleanup tasks. Generating 880 CFM of air volume and high air speed, this blower moves leaves, grass clippings, and debris with ease, rivaling the performance of gas-powered models without the noise, fumes, or maintenance hassles. Powered by the EGO POWER+ 56V ARC Lithium battery system, this blower is part of a comprehensive outdoor power tool ecosystem that delivers professional-grade results for homeowners and landscapers alike.

Exceptional Air Performance

With 880 CFM of air volume, the LB8800 blower generates the force needed to clear heavy leaf piles, wet debris, and stubborn dirt from driveways, sidewalks, patios, and lawns. The high air speed concentrates airflow for maximum impact, allowing you to move material quickly and efficiently. Whether you are clearing large properties or tidying up small garden beds, this blower adapts to the task with variable-speed control that lets you dial in the perfect amount of power.

Lightweight and Ergonomic Design

The blower features a balanced, lightweight construction that reduces user fatigue during extended use. The ergonomic handle and trigger placement provide comfortable control, allowing you to work for longer periods without strain. The compact design makes storage simple, and the well-balanced weight distribution ensures stable, precise operation even when working in tight spaces or around delicate plants.

Variable Speed Control

The variable-speed trigger puts you in complete control of air output. Use lower speeds for delicate areas like flower beds and mulch, medium speeds for general cleanup, and maximum power for heavy leaf piles and stubborn debris. This flexibility conserves battery life when full power is not needed, extending runtime and allowing you to complete more work on a single charge.

Quiet and Clean Operation

Unlike gas-powered blowers that produce loud, disruptive noise, the EGO LB8800 operates at significantly lower sound levels. Work early in the morning or late in the evening without disturbing neighbors or violating noise ordinances. The battery-powered design produces zero emissions, eliminating exhaust fumes and reducing your environmental impact. Enjoy fresh air while you work and contribute to a cleaner, quieter neighborhood.

EGO POWER+ System Compatibility

This blower is powered by the EGO 56V ARC Lithium battery platform, which is compatible with the entire EGO POWER+ lineup. Use the same batteries that power your lawn mower, string trimmer, chainsaw, and other EGO tools, reducing cost and clutter. The battery provides substantial runtime, and higher-capacity batteries are available for extended work sessions. The integrated fuel gauge displays remaining charge at a glance, so you always know when it is time to recharge.

Minimal Maintenance and Instant Start

EGO battery-powered tools require virtually no maintenance. There are no spark plugs to replace, no air filters to clean, no carburetors to adjust, and no fuel to mix. The blower starts instantly with the pull of the trigger, eliminating the frustration of pull-cord starting. When the season ends, simply remove the battery and store the blower without worrying about fuel stabilizers or winterization procedures.

Ideal Applications

The EGO 880CFM Blower Tool Only is ideal for homeowners managing residential properties, landscaping professionals who need reliable equipment, and anyone who values performance, convenience, and environmental responsibility. This blower handles fall leaf cleanup, spring yard preparation, post-mowing debris removal, and year-round outdoor maintenance tasks with ease.
