## Product Description

# EGO EGO 9 Gallon Wet/Dry Vacuum Tool Only

The EGO EGO 9 Gallon Wet/Dry Vacuum Tool Only WDV0900 is a versatile 3-in-1 outdoor power tool that vacuums, mulches, and blows leaves and debris. This innovative design eliminates the need for multiple specialized tools, saving money, storage space, and time. Whether you are clearing leaves in the fall, tidying up garden beds, or blowing grass clippings off driveways, this tool adapts to the task. Powered by the EGO POWER+ 56V ARC Lithium battery system, it delivers strong performance with zero emissions and quiet operation.

## Three Tools in One

This product functions as a powerful blower, an efficient vacuum, and a high-performance mulcher. The blower mode generates of air volume, making quick work of clearing leaves, grass clippings, and lightweight debris. Switch to vacuum mode to collect debris into the integrated collection bag, perfect for cleaning flower beds, patios, and tight spaces. The built-in mulcher shreds collected material, reducing volume significantly and producing nutrient-rich mulch for gardens and compost bins.

## Powerful Blower Performance

In blower mode, this tool moves substantial air volume at high speed, handling heavy leaf piles and wet debris. The variable-speed trigger allows you to adjust power output to match the job, conserving battery life when full power is not needed. The lightweight design and ergonomic handle reduce user fatigue during extended use, while the balanced weight distribution ensures comfortable operation.

## Efficient Vacuum and Mulching

The vacuum function collects leaves and debris directly into the attached collection bag, eliminating the need for raking and bagging by hand. The high-ratio mulching system shreds material as it enters the bag, reducing volume by up to 16:1. This means fewer trips to empty the bag and less waste to dispose of. The mulched material is ideal for composting or spreading as organic mulch around plants.

## Easy Mode Switching

Transitioning between blower, vacuum, and mulcher modes is straightforward and tool-free. Simple latches and connectors allow you to reconfigure the unit in seconds. The collection bag attaches securely and features a large opening for easy emptying. Durable construction ensures reliable performance season after season.

## EGO POWER+ System Integration

This tool is powered by the EGO 56V ARC Lithium battery platform, compatible with all EGO POWER+ equipment. Use the same batteries that power your mower, trimmer, and chainsaw, simplifying your outdoor power tool collection. The battery provides ample runtime for most residential properties, and the fuel gauge keeps you informed of remaining charge.

## Environmentally Friendly Operation

Battery power means zero emissions, no fuel mixing, and significantly quieter operation compared to gas-powered vacuums and blowers. Work early in the morning or late in the evening without disturbing neighbors. The tool starts instantly and requires minimal maintenance, making outdoor cleanup faster and more convenient.

## Ideal Applications

The EGO 9 Gallon Wet/Dry Vacuum Tool Only is perfect for homeowners who want a single tool that handles multiple tasks, users who value convenience and versatility, and anyone looking to reduce the number of specialized tools in their garage. This 3-in-1 solution is ideal for fall leaf cleanup, spring garden preparation, and year-round yard maintenance.
